EXPERIENCE

Front-End/Back-End Developer Intern

Interlude Outreach

Oct 2020 – Present

- Worked with Flutter to develop the front-end and UI for login, home screen, & user profiles.
- Integrated Firebase user authentication and real-time data storage into the back-end.

CS 101 Group Tutor

April – June 2018

- Guided students in programming abstract data types in Java and C++ during labs.

PROJECTS

NYC Fare Evasion

Sept 2019 – Dec 2019

- Wrangled census data for demographics and median household income to correlate with fare evasion arrests data per subway station.
- Created data frames and visualizations using Python pandas and matplotlib packages.
- Programmed with HTML/CSS to develop a webpage with an interactive map feature.
